

TRAPMASTER™

Steam Trap Management Software

*The fast, accurate way to maintain
your entire steam trap population.*

Yarway TrapMaster™ Steam Trap Management Software is a Windows based program that lets you survey, manage and continuously monitor your entire steam trap system. It creates a custom database, then lets you analyze the results in many different ways.

This data can directly increase your plant's efficiency, reduce operating costs and indicate areas where changes and improvements can be made. And unlike other programs, the entire TrapMaster software comes on just one floppy disk. That means you can load it - and benefit from it - appreciably faster.

- The most complete steam trap management software.
- Windows® based, so it's easy and familiar to use.
- Collects, stores, organizes and sorts steam trap survey data.
- Custom database can be built from survey sheets or from hand held data collectors.
- Shows overall historical performance and trends.
- Shows detailed historical performance, trap by trap.
- Holds substantially more information on exact trap location than other programs.
- Comes on just one disc, for fast loading & implementation.
- Results can cut costs, improve efficiency and increase profitability.
- Demo disk available, free.

TrapMaster is a single floppy disk. Other programs require loading up to 7. Yet TrapMaster stores a lot of survey information, too.

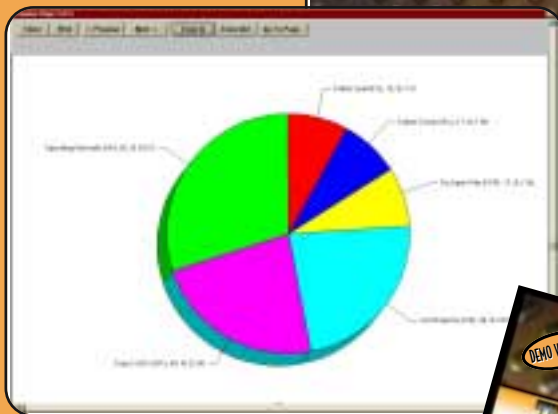

You collect database information with this fast, state-of-the-art hand held computer. Or you can use conventional data sheets.

TrapMaster software is Windows® based. So it's easy and familiar to use, and doesn't require a steep learning curve.

TrapMaster has the capacity to cope with the largest plants. In fact, there's virtually no limit to the amount of steam trap information it can store.

As well as providing 'big picture' data on the overall efficiency of your steam trap operation, TrapMaster can show detailed historical data of every individual trap in your system.

Get a sample TrapMaster disk. It'll give you a flavor of the most sophisticated steam trap software program of all. And it's free.
