

Innovative Solutions

Westlock Controls is a leader in innovative solutions for networking, monitoring, and controlling process valves.

Your project's success is our passion. Our team of flow control professionals and in-house engineers are ready to help you anywhere in the world. Our highly responsive customer service team is recognized for outstanding service and creative problem solving.

We have placed millions of conventional control monitors in service and have used our Intellis products to install hundreds of thousands of networked valves globally. That means our team of technicians has application and field experience that is second-to-none.

Westlock Controls utilizes emerging technologies to set next-generation standards. But just as important, we discover technologies the old-fashioned way – by listening to our customers. Each day, our customers help us better understand how our products work in the field. We use this knowledge to enhance our products' process, maintenance and operational efficiencies. This means each year, our product line continues to evolve, becoming more advanced and ergonomic.

Our people who focus on technology, and our reliable products manufactured to the highest industry standards, make Westlock Controls your trusted solution for networking, monitoring and controlling process valves.

Environmental, Health and Safety (EHS)

Westlock Controls maintains its status as a Conditional Small Quantity Generator of environmental waste and is a two-time recipient of the New Jersey Governor's Occupational Safety and Health Awards Program Citation of Merit, demonstrating our commitment to an EHS Policy.

Quality Policy

Our most fundamental policy at Westlock Controls is to manufacture and provide safe, reliable, quality products and services.

We are dedicated to performing in a manner that meets the expectations of our customers.

We are committed to our policy on quality, by striving to:

- Provide the leadership for, and communication about, quality being the responsibility of each employee.
- Provide a clean, safe workplace for employees.
- Be environmentally conscious and sensitive in all aspects of our business.
- Be a strong and consistent performer.
- Provide continual process improvement through internal auditing, management review, and action.
- Provide on-going training to help ensure employee excellence in work methods and best quality practices.

Facility Processes

Our facilities and quality assurance procedures are often inspected and audited regularly by major quality authorities such as Lloyd's Register, ISO, IEC, ATEX and others. Contact your sales representative for a list of current certifications and registrations.
